

Alpine Services – Valve Supplier for Upstream, Midstream and Downstream Industries. We distribute recognized valve brands known for dependability, quality and craftsmanship. We offer a diverse range of valves from standard steel to exotic metals, special and severe service applications. All new valves are supplied with MTRs and Test Reports.

In addition, we supply hoses and certified remanufactured valves. Remanufactured valves are built with new parts made in the USA. Each remanufactured valve is hydro & gas tested and delivered with test reports.

All hoses are custom made to order per application and length. Hoses offered are metal braid, composite, rubber or plastic for the Refining and Chemical Industries.

Items include but are not limited to:

- Ball Valves - Floating & API 6D Trunnion Mounted.
- Custom made valves for emergencies – Ball, Gate, Globe and Check.
- API 6D Full Port Through Conduit Gate Valves – Expanding and Slab.
- Dual Disc Check Valves – Wafer, Lug & Double Flanged.
- Gate, Globe and Check Valves – Forged and Cast Steel.
- Butterfly Valves – Resilient Seat and High Performance.
- Gate, Ball and Choke Valves API 6A – 5000 – 20,000 PSI
